The complete version of **Matrixframe** can be activated as follows:

1. Make sure you have configured your eduVPN using
   https://www.tudelft.nl/studenten/ict/ict-voorzieningen/vpn

2. Download the most recent version of Matrixframe from the official website: https://www.matrix-software.com/nl/matrixframe_studentversion_download.

3. Install Matrixframe and follow the instructions. At the end it will show you the following screen:

4. Now make sure you are connected with the previously configured VPN client.

5. Click on "Settings", and copy the following address:

6. Press "Close". You should now have access to the complete version of Matrixframe as long as you are connected to the VPN. Don't forget to disconnect after you're done!
